

Manthio

A learning platform by apigenio

The problem

- Classic courses are fully synchronous
- Classic courses do not feature AI, preparation or Interaction between students
- Classic courses are soon forgotten (or not consumed if only)

State today

Python Bootcamp

Our two-day Python Bootcamp takes you from zero to confident Python developer. You'll learn alongside other students with direct access to an experienced instructor. From basic syntax through data structures and functions to your first real project — all with live feedback and hands-on exercises.

📁 8 Modules 📖 32 Lessons ⌚ 2 Tage

✉ Send course inquiry

Skills You'll Learn

- ✓ Python syntax & semantics
- ✓ Control flow & loops
- ✓ Working with modules & packages
- ✓ Data structures (lists, dicts, sets)
- ✓ Functions & error handling

Prerequisites

- ✓ Basic computer skills
- ✓ Willingness to learn

Ready to start?

Course Modules & Lessons

1 Setup & Python Fundamentals

Installation, virtuelle Umgebungen, REPL, Syntax, Variablen, Datentypen und erste Skripte 1.5h

- ▶ Python installieren & IDE einrichten
Python 3, VS Code/PyCharm und erste Projektstruktur 20min
- ▶ REPL, Skripte & venv
Interaktiv arbeiten, Skripte ausführen, virtuelle Umgebung anlegen 25min
- ▶ Variablen & Datentypen
int, float, bool, str und dynamische Typisierung verstehen 25min
- ▶ Dein erstes Skript
Kleines Interaktives Skript bauen und ausführen 20min

Your Trainer

David Pinezich

Experienced IT architect and trainer specializing in Python, Cloud Architecture, and Enterpris...

💬 Talk to the trainer

State today

- You book a course
- You might do a prep. exercise
- 2 days full synchronous training
- 1 week later content is forgotten

Also courses are quite expensive

The idea

Switching the experience

Manthio is a platform that

- helps you prepare
- helps you keep track
- allows learning in your time schedule
- is versatile, modern and AI-ready

What has been done

- A group of students did a research
- Some brand ideas were created
- The name and slogan was defined

What I need now

- A fully polished mockup that shows all functionality
- Adds a branding and UI/UX concept

A person who "likes learning" is already aware of how online learning (Udemy, Pluralsight, etc.) works and is an UI/UX - design specialist.

I am looking for a design sprint, not yet coding (system architecture constraints are work in progress).

Next steps

I will create a full set of design-requirements (by monday)

Offer me a person (or two), their rate and their availability :)

Thank you

That is all for the moment
